

# What's Next from City Wide?

## PARKING LOT SERVICES

Ask your City Wide contact for more information

The concrete and asphalt areas outside your buildings are one of your largest ongoing investments. And, they're constantly under assault. Every day sun, weather, temperature, traffic, and even chemicals work to break down these surfaces.

Repairs to concrete and asphalt surfaces can be pricey, but the best way to manage that cost is to think long-term. City Wide begins with a survey of your parking lot and exterior concrete structures like curbs and drains. Then, we create a long-term care plan that maximizes appearance and minimizes cost.

Your plan will address particular pain points first, such as cracks, potholes, depressions, and faded striping.

We will recommend whether you need to fill, seal, patch, resurface, or replace problem areas, and we can also help refresh faded striping or repair crumbled curbs and fixtures.

City Wide will let you know which services will enhance the look and increase the lifetime of your investment based on your climate and parking lot traffic level.

The best part is, City Wide manages all of these services for you. We make the plan, execute the service, and ensure the work is completed to your satisfaction.

Contact City Wide today for a total parking lot maintenance and building assessment.
