SNOW AND ICE REMOVAL

Ask your City Wide contact for more information

Yes, now IS the time to plan for winter snow and ice removal! In the sweltering summer heat you might not be thinking about snow and ice, but planning now can save you time and money in the long run. Here are four tips from our experts:

Review your snow removal contracts and procedures NOW.

High summer is the best time to review your snow removal contracts. City Wide can help you prepare and can ensure the best prices and availability if you review your contract now.

Repair your property.

Take a close look at your parking lot. Patch minor cracks and crumbling areas, before the temperature drops. Winter ice and rain can transform minor cracks into major problems.

Prepare your parking lot.

Wet winter weather can also obscure your parking lot striping, causing confusion and compromising safety. Take a look at your crosswalks and curbs. Are they clearly marked?

Protect your floors.

Keep wintertime salt and sand out of your building with a matting program. City Wide can assess your building and recommend an appropriate matting solution for your needs.

Don't get left out in the cold! Contact City Wide today for more information on winter preparation needs.
